Programming Languages

- Python
- R
- C++
- Java
- Godot

Other Proficiencies

- Github
- Bash / Scripts
- Pytorch
- Sklearn
- Numpy
- Pandas

Interests

- Piano / Vocal Performance
- Sci fi - fantasy reading
- Speedsolving
- Spanish

Education

Brigham Young University — April, 2027
B.S. in Computer Science — Provo, UT
Emphasis in Bioinformatics
GPA : 3.97
Minors: Mathematics

Experience

Research Assistant (CS) — April 2024 - Sept. 2026
Brigham Young University — Provo, UT

- Assisted PhD Students in creating tools to more easily run research studies while allowing them to focus on what mattered. The results are available on my github. Most notable are JHG-SC, aat_staghare, and JHGeo
- Refined and expanded on existing codebases / published projects to further explore novel results within the field. Rewrote JHG (under JHGeo) for up to 2x increase simulation speed by removing file writing overhead.

Research Assistant (Bio) — Sept 206 - Presesnt
Brigham Young University — Provo, UT

- Created a tool using Python and Bash to interface with industry standard tools to create a tool to allow for much faster data creation and labelling to create training data for an unsupervised auto segmentation CryoEt classifier.
- Created Bash Scripts to facilitate connection to the BYU Fulton Supercomputers for easier access and requests to decrease waisted time for requests and request approval.

Projects

Personal Website: https://images.seanvs.us/

- Created a personal website that hosts some personal images, my resume, and a headache tracker. Protected / hosted with cloudflare for security of health data, but the rest of the repo is public and under my-pi-sites on my github

Relevant Coursework

Deep Learning, Bioinformatics Algorithms, Mathematics of Data Science, Advanced Machine Learning, Funamentals of mathematics, Algorithm Design and Analysis, Molecular Biology, Genetics,
